I believe that I should be able to choose which weather and traffic report I want to listen too. I am paying a monthly fee for my XM Radio, and I prefer the extra value that XM traffic and weather provides. Furthermore, the quality of the traffic reports is second to none. Also, you have to wait 10 minutes for a traffic report on terrestrial radio and I get constant updates with XM-no waiting. It is my choice to get my weather and traffic from my Satellite Radio Provider. Thank You.
